How can Enzymes Enhance Farm Productivity? Boost Nutrient Uptake with Lumen Z

Enzymes are natural proteins that help unlock nutrients in the soil, enhancing nutrient availability and supporting healthy soil life.

Lumen Z is an enzyme with zinc. Zinc acts as cofactor, and helps to improve enzyme performance.

Why use Lumen Z?

- ✓ **Enhance early establishment & plant vigour:** Enzymes improve root structure, thereby improving plant growth and development.
- ✓ **Ease of use:** Low use rate allows simple coapplication for in-furrow liquid injection.
- ✓ **Sustainability benefits:** Naturally unlocking available nutrients, especially phosphorus.
- ✓ **Compatible:** With fertilisers and pesticides.
- ✓ **Reliability:** Enzymes are robust and stable.
- ✓ **Proven performer:** Backed by evidence.
